

Situation 1
Empty Car at a Receive-only Industry
Non-Perishable Freight

Prototype Equivalent

A customer who only receives goods, and never ships them, has unloaded an incoming shipment and now has an empty car at his location. He advises the Freight Agent that the car is empty and available to be returned to the railroad.

S&P Implementation

Wayfreight arrives at an industry and finds a car card containing a waybill in the **Hold Box**.

The waybill identifies this industry as the consignee ("TO" party).

The waybill is removed from the car card and placed in the Delivered Box.

The Freight Agent checks and sees that this is a "receive only" industry (5 card boxes).

The only possible disposition for an empty car at a "receive only" industry is to return it to the Solomons Yard.

The Freight Agent takes an Empty Car Bill of the appropriate AAR type from the Empties Box and inserts it in the car card (see Handling of Tank Cars-Situation 20 for exception).

The car card is returned to the Hold Box.

When all work at this industry is completed the Freight Agent moves any cards in the Hold Box to the Pickup Box and any cards in the Setout Box to the Hold Box

The train is released to move to the next industry.
