

Situation 18
**Reefer returning to Solomons
from Meat Packers**

Prototype Equivalent

Once loaded at the industry, perishable freight needed to be shipped as soon as the railroad could move it. The customer would notify the Freight Agent that perishable freight was ready to be shipped. Shippers could order icing service from the Freight Agent to be included with the movement of his product to its final consignee

S&P Implementation

When a reefer arrives Solomons with a car card containing a Perishable Freight waybill for a meat shipment, it is the return from the meat packer of a loaded car ready to be bunker (Initial) iced and sent on its way on a through freight. Place the car card with the Perishable Freight way bill in the Bunker Icing Box. When the time required for bunker icing (15 fast-clock minutes) has expired, spot the bunker-iced reefer for the next outbound through freight. Remove the corresponding car card from the Bunker Icing box and place the car card with the Perishable Freight Waybill in the Outbound Through Freight Box.

Situation ID Triggers

Reefer arrives at Solomons with a Perishable Freight waybill for a meat shipment in the car card.
